We Set The Gold Standard in High-Performance, Centerfire Ammunition.

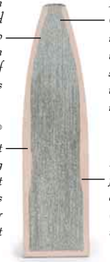
YET, THESE BULLETS ARE ANYTHING BUT STANDARD.

Behind the Premier® label is advanced technology, high performance and a 200-year-old tradition of quality and reliability. Quite simply, this is the finest line of hunting cartridges ever available from Remington.® At the front of the Gold Box™ line is a trio of cartridges that reap custom-load results, with out-of-the-box convenience: Core-Lokt® Ultra, Scirocco™ and AccuTip.™ Each bullet type is as distinctive as an antelope's hoof print.

The Core-Lokt Ultra, a dependable, all-around performer, is the most accurate bonded bullet made. Precise and deadly, Scirocco is the *first* bonded polymer-tipped bullet to meld great ballistic performance with superior on-game results. And the new AccuTip tames extreme-range hunting for mid-size game; it's the most accurate rapid-expansion, polymer-tipped bullet on the market.

Exceptional bullets start with exceptional components. And, again, Remington takes no shortcuts. Our Kleanbore® centerfire primers produce unrivaled ignition reliability. Specially alloyed brass casings are the industry's strongest. And carefully blended, precisely metered powders deliver consistent velocities, shot after shot. From Alaska caribou to Montana muleys to whitetails in Maine, Remington Gold Box centerfire ammunition meets virtually every big-game hunting need. And, of course, the bullets are backed by Remington's good-as-gold reliability. Remember, no shortcuts.

PREMIER® CORE-LOKT® ULTRA



New jacket design is 20% heavier. Engineered with a new wall profile to even better initiate expansion over broad range of terminal velocities

50% thicker Core-Lokt® section maintains bullet integrity by better controlling and limiting expansion at higher velocities. Increases mechanical locking of rear core into jacket

Improved accuracy. Created with a proprietary manufacturing process which eliminates jacket stretch for near-perfect wall thickness (resulting in better in-flight stability)

Bonded bullet design further insures controlled expansion (1.8x) with 85% weight retention

BONDED. DEADLY ACCURATE. PEACE OF MIND.

30-06 SPRG, 150-gr. Premier® Core-Lokt® Ultra

If you had to choose one bullet, this should be it: the bonded Premier® Core-Lokt® Ultra — the most accurate bonded bullet made. Thanks to a revolutionary manufacturing process, Premier Core-Lokt Ultra's thick, progressively tapered copper bullet jacket and lead bullet core are bonded (or fused) and mechanically locked together. Besides making you a more confident hunter, this proprietary process guarantees two things: accuracy and knockdown power. The Core-Lokt's bonded core is literally fused to the extra-heavy, progressively tapered jacket to prevent separation and maintain absolute bullet integrity, while expanding at a carefully controlled rate. As a result, it retains up to 95 percent of its weight, creating even and symmetrical mushrooms to 1.8x at ranges from 50 to 400 yards. With its improved accuracy and knockdown power, the Core-Lokt Ultra will actually extend the range and on-game performance of your favorite big-game rifle, allowing you to shoot bigger game at longer ranges than you ever thought possible. Designed to excel in all hunting situations, and at all reasonable hunting ranges, the Core-Lokt Ultra bullet is not only the most accurate, but the most versatile bullet manufactured today, which, simply put , makes the Core-Lokt Ultra the new standard in versatile, high-performance hunting bullets.

Truth in Mushrooms

The mushrooming sequence of the Premier Core-Lokt Ultra dramatically demonstrates this bullet's reliable, controlled expansion. Over a broad range of distances, it delivers an ideal 1.8x diameter mushroom, even in a tough test medium like water.

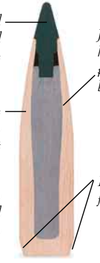
PREMIER® SCIROCCO™



Precision-shaped polymer tip for reduced frontal air resistance

Secant ogive nose profile for high ballistic coefficient

75% weight retention and instant controlled 2x expansion

Jacket and core locked together with proven Swift™ bonding technology

Boat tail base design for reduced air drag

HERE'S THE DEAL. WE SUPPLY THE TECHNOLOGY. YOU SUPPLY THE TAXIDERMIST.

30-06, 180-gr. Premier® Scirocco™ Swift™ Scirocco™ Bonded 5 shots, .8", 100 yds.

A break-through in centerfire ammunition, Premier® Scirocco™ is the first bonded polymer-tipped bullet to successfully marry match-grade ballistic performance with superior on-game performance. In fact, this remarkable bullet is unquestionably the most advanced high-performance bullet ever to sit atop a factory load. Its patented bonding technology retains more than 75 percent of its weight for maximum penetration and knockdown power. Plus, it delivers absolutely controlled expansion at all velocities. And, of course, our precision loading process — using the finest available components — ensures that the Premier Scirocco bullet is delivered with quality unmatched by any other brand. This season, accept no trade-offs. Pick up Remington® Gold Box™ Premier Scirocco centerfire ammunition.

Swift™ Scirocco™ Bonded bullets expand reliably over a wide range of terminal velocities.

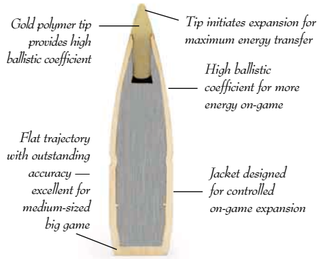
PREMIER® ACCUTIP™



HEART: POUNDING. CROSSHAIRS: QUIVERING. BULLET: MATCH-GRADE ACCURATE.

243 Win, 95-gr.
Premier® AccuTip™
5 shots, .4", 100 yds.

Meet the equalizer: the Premier® AccuTip™ centerfire bullet. Featuring a precision-engineered polymer-tip bullet designed for match-grade accuracy (sub minute-of-angle at 100 yards), it offers an unprecedented combination of super-flat trajectory and deadly down-range performance. In fact, the Premier AccuTip bullet is the most accurate rapid expansion polymer-tipped bullet on the market. The gold polymer tip initiates immediate expansion for maximum energy transfer, while the precisely designed copper jacket controls expansion to promote deep penetration — even at long ranges and lower velocities, making it a superb choice for hunting mid-sized game (whitetail, mule deer and antelope) at longer ranges. Of course, as part of the Remington® Gold Box™ ammunition family, it is precisely manufactured to near custom-load quality, using only the finest components. Like we said — unprecedented.

PERFORMANCE ADVANTAGES:

120 Years of Bullet-Making Leadership — for Performance You Can Trust.

SUPERIOR QUALITY:

Remington® Gold Box™ represents a family of ammunition that is as close to custom hand-loads as factory cartridges can get. Employing the industry's most advanced manufacturing process for high-performance ammunition, every load is assembled with meticulous care. Only the finest components are used, and powders are carefully blended and precisely metered to deliver consistent shot-to-shot velocities.

SUPERIOR PERFORMANCE:

Because it is the new standard in high-end ammunition, shooters seeking unparalleled performance have an easy decision. Remington Gold Box ammunition has proven to actually enhance the performance capabilities of your favorite centerfire rifle. Its superior ballistic capabilities will allow you to shoot more accurately with cleaner kills at longer distances than you ever thought possible.

SUPERIOR RELIABILITY:

Remington has lead the way in developing superior performing bullets in both general and highly specialized shooting applications. With state-of-the-art bullet technology loaded in such a way that performance is near custom, the Remington Gold Box name is something that you can count on — especially when you have one shot on the line.

THE BOTTOM LINE:

Remington Gold Box ammunition continues to set the gold standard in centerfire ammunition.

Remington® Country. It's where you'd rather be.

It's where a record-book buck emerges from the timber like a ghost. It's where the distant bugle of an old bull keeps hope alive. And it's where you'll find the world's most steadfast line of hunting arms and ammunition. Gear with an unequaled heritage in the American woodlands, fields and flyways. This is Remington® Country. It's where you'd rather be.
