## .50-CALIBER GENESIS MUZZLELOADER

THE NEXT GENERATION OF MUZZLELOADING EFFICIENCY. Legendary Remington® accuracy, magnum powder and easy cleaning in a weather-resistant design. Our innovative TorchCam™ action rotates from the fixed breech for super fast priming and completely seals your 209 primer from the elements. It delivers rapid, super-hot ignition in the most extreme conditions. And it is designed for cleaning in a flash. Simply remove the breech plug, swab the barrel and your finished.

## TRADITION.

SOME THINGS NEVER CHANGE. Like if it bears the Remington name, it's going to be accurate straight out of the box. And incredibly reliable in the field. We put the Genesis through the paces — up the mountains, across the plains and into the timber — to ensure it is built to our standards and yours.

The long-standing tradition of Remington accuracy began with a muzzleloader — a flintlock handcrafted by Eliphalet Remington in 1816. This is where we began. And while the Genesis is a new design, it's built on one of the most solid foundations in gunmaking.

Expect tight groups, absolute dependability and long-term service. Sure, we made revolutionary advancements in muzzleloading, but we just had to keep some things the same. We know you won't be disappointed.

SAFETY FIRST. Along with all of its innovative performance-enhancing features, the Genesis breaks new ground in muzzleloading with one of the safest designs ever devised. The hammer never makes contact with the firing pin unless it's fully cocked and trigger is pulled. For added assurance, we also equipped the trigger with crossbolt safety to prevent inadvertent trigger pull.

## THE ANATOMY OF MUZZLELOADER MASTERY.

new era of muzzleloading efficiency. Literally. Push upward with your thumb and our new TorchCam" breech block rotates for super fast priming. It locks your 209 primer in a weather-resistant vault when closed, and it rotates for reloading in a flash. Our innovative action isn't the only thing that makes the Genesis a superior breed of muzzleloader. Magnum power, a sleek, rock-solid design and legendary Remington® accuracy launch it firmly atop the in-line food chain.

TRIGGER – EASIER TO CLEAN, EASIER TO KEEP CLEAN. The entire trigger and hammer assembly slides out for cleaning with removal of a single hex screw. But this will rarely be needed because the trigger group is sealed from the breech area. It stays cleaner longer for reliably smooth operation and rapid ignition.

HAMMER - AMBIDEXTROUS HAMMERSPUR. Our new hammer design provides

the ultimate in safety and control. The hammer never comes in contact with the firing pin unless it's fully cocked and the trigger is pulled. And the textured spur can be mounted on either side to give left- and right-handed shooters a rigid grip through cocking and letdown—with no scope interference.

BARREL – EXCEPTIONAL ACCURACY. TRUE MAGNUM POWER. With a full 28" of powder-burning steel, the Genesis generates maximum velocity from magnum 150-grain charges (Ffg or equivalent). The 1-in-28" twist provides optimum stability for sabots and other modern muzzleloading projectiles.

**ACTION** – **EXCLUSIVE NEW CAMMING TORCHCAM** ACTION. Hunt with confidence in the most extreme conditions. The camming breech face seals the 209 primer

from the elements and channels maximum fire to your powder charge for the ultimate in dependability. Priming takes only a split second. Simply flip upward with your thumb, place the primer on the exposed breech plug, and push down to lock the breech face back into place. Cleaning is also a breeze. Rotate the action out of the way, remove the

GENESIS™ ML SF CAMO THUMBHOLE

breech plug, swab the barrel and your finished.

#### FRAME - A LONG-RANGE CANNON THAT HANDLES LIKE LIGHTNING. Our

TorchCam™ action provides an extremely compact platform for barrel lockup, Despite its 28" barrel, the Genesis comes up quick when you need to make a snap shot. And the frame's slim lines add to its handiness. Prepare to stretch the limits of muzzleloader lethality with a gun that feels like a carbine.

### FEATURES

- Legendary Remington accuracy
- Revolutionary new camming TorchCam™ action super fast priming, weather-resistant and easy to clean
- The action channels maximum fire from the 209 primer for rapid ignition in the most extreme conditions
- Velocity-boosting 28" barrel ensures full burn of magnum 150-grain charges
- Ambidextrous Hammer Spur
- Williams™ fiber-optic sights
- Drilled and tapped for scope mounts
- · Aluminum anodized ramrod with jag
- · Front and rear swivel studs
- · Crossbolt safety
- Removable 1/16" breech plug
- · Bullet-guiding muzzle
- Optimized for use with Remington Kleenbore 209 Muzzleloading Primers
